THE COLLEGE – AN OVERVIEW

SNS College of Technology, Coimbatore is an excelling Institution in the state committed to produce engineers with high caliber and professionalism by accelerating Engineering and Technological education under one roof. The College was established in 2002 by Sri SNS Charitable Trust with a high mission and noble thought of giving professional education to the needy. The Campus is well structured in a beautiful environment with best structural facilities. The college offers 9 UG Courses and 9 PG Courses in leading fields of Engineering and Technology. The College has a congenial and conducive atmosphere for holistic learning and growth. Apart from academic activities the college is taking leaps towards achieving excellence in Research and Developments. The Departments of Mechanical Engineering, Civil Engineering, Computer Science Engineering, Mathematics, Chemistry and Master of Business Administration have been recognized as Research Department by Anna university, Coimbatore for doing research works leading to Ph.D. degree.

ABOUT THE DEPARTMENT

The Civil Engineering Department of SNS College of Technology was established in the year 2009. The department has twelve motivated and highly qualified faculty members headed by a Dean. The faculty members carry out research and consultancy activities. The department has 70 computers with 20 Mbps internet connectivity. The department is well equipped with Concrete and Highways, Strength of Materials, Hydraulics and Fluid Machinery, Soil Mechanics, Environmental Engineering, Survey and Computer Laboratories. The department of Civil Engineering offers the B.E Civil Engineering Undergraduate Programme.

OBJECTIVES OF CONFERENCE

Civil Engineers have a leading role in planning, designing, building and ensuring a sustainable future. Civil Engineers provide the bridge between science and society. In this role, engineers must actively promote and participate in multidisciplinary teams with other professionals, such as ecologists, economists, and sociologists to effectively address the issues and challenges of sustainable development.

The civil engineering profession recognizes the reality of limited natural resources, the desire for sustainable practices (including life-cycle analysis and sustainable design techniques), and the need for social equity in the consumption of resources. Hence the main objective of the conference is to provide a platform to disseminate knowledge to working professionals, post graduate and under graduate students and faculty members on recent trends in Civil Engineering.

The conference covers a broad spectrum of Civil Engineering, with focus on the following domains:

- ★ **Technologies for Sustainable Development**
- ★ **Emerging Trends in Green Building**
- ★ **E-Waste Management**
- ★ **Advanced Trends in Waste Water Treatment**
- ★ **Eco-Friendly Transport System**
- ★ **Solid Waste Management**
- ★ **Concrete Technology**
- ★ **Water Resources Engineering**
- ★ **Geo-technical Engineering**
- ★ **Remote Sensing & GIS Applications**
- ★ **Modeling Tools in Civil Engineering**
- ★ **Disaster Mitigation and Management**
- ★ **Infrastructural planning and management**
- ★ **Nanotechnology Applications in Civil Engineering**
